

Ministry of Electricity and Renewable Energy

Renewable Energy Authority of Libya (REAO)

Planning and Studies Dept.

Companies Pre-qualification

2021

Introduction

The Renewable Energy Authority of Libya (REAoL) was established in 2007 to promote the development of renewable energy wide applications. It is the main firm in having full responsibility for implementing renewable energy projects in Libya.

The Aim of the request:

REAoL is planning to develop a renewable energy national plan 2013-2025, which sets renewable energy targets in the electric energy mix as: 3% by 2015, 7% by 2020, and 10% by 2025. So REAoL is looking for consulting companies, authorities, corporations, organizations...etc who are specialized in the field of renewable energy and who are willing to cooperate in executing projects and related programs. The aim of this request is to establish a data base for all these firms.

This data base will support the central tender committee at the Ministry of electricity and renewable energy, to facilitate its work and provide it with selected list of expertise in the field.

REAoL will adopt some of well known performance terms in preparing these lists. Therefore, these lists will have a priority for ranking consultants by the tender committee. This will be based on the information provided by these parties.

Objectives:

REAoL intends to invite companies, consultant offices, consortiums, firms.....etc, in fields of renewable energy in general, to submit their technical services, technical support, capacity building experience, know-how....etc, which would provide data base for REAoL when performing certain tasks in order to achieve but not limited to the following:

- Terms of reference TOR and Request for proposal RFP, for RE projects.
- Tender documents for RE projects, strategic plans, engineering services, investment proposals.
- Follow up tender processing and contract preparation.
- Helping and contributing to technical and financial evaluation of contracts submitted for RE projects' implementation.
- Leading and supporting technical negotiation related to contract subject.
- Supervising the implementation of RE projects, including connection to electrical grid and services during guarantee period of RE projects' operation.
- On job training (related to type of work of REAoL staff), such as analysis, assessment, planning, programming, monitoring, repairing, maintenance, controlling....etc.
